

RED FOX ELD

ELD Product Guide

ELD Overview

Welcome to the Electronic Logging Device (ELD) User Manual.

Our ELD system offers a user-friendly solution for managing your Hours of Service (HOS) records in compliance with FMCSA regulations. With the ELD, you can efficiently track your duty status, breaks, and driving time, ensuring you stay safe and compliant on the road.

ELD Hardware Installation

Installing the ELD hardware is quick and simple.

Plug the device into your vehicle's diagnostic port using the supplied cable, which comes in 6-pin, 9-pin, or OBDII variants. For dedicated cable harnesses, contact the ELD provider.

ELD App Setup

Syncing Data...

Getting started with the ELD app is easy.

Download and install the app on your mobile device from the app store.

Once installed, sync the app with the ELD hardware via Bluetooth for seamless data transmission: log in with your unique credentials (portal users and drivers must have different login details), and select your vehicle from the list.

Log Management

Jan 6	(Sun)	3.38
Jan 7	(Mon)	4.45

Efficiently manage your logs with the ELD app.

Access your electronic HOS records for different dates and view detailed information about duty status changes, including time, duration, and location.

To ensure compliance, remember that driving time cannot be reduced. However, you can conveniently modify duty status records when appropriate. Don't forget to digitally certify your logs when your shift concludes.

The portal provides comprehensive monitoring and compliance management for your fleet. Access real-time data on each driver's duty status, remaining hours, and HOS violations. Download logs in PDF format and transfer logs for inspections directly from the portal. Filter logs by date, driver, or vehicle to save time and effort.

Additional Features

In addition to HOS compliance, the ELD offers various extra features to enhance your fleet management. Benefit from GPS tracking to monitor your vehicles' locations and IFTA calculations to simplify fuel tax reporting. Preconfigured statuses (i.e. yard moves and personal use), driver information, and vehicle details are also available to streamline your operations.

With this comprehensive user manual, you'll have all the information you need to optimize your HOS management, ensure compliance, and enhance your fleet's efficiency with the ELD system. Drive confidently, stay compliant, and streamline your operations with ease!
