Download the app to a compatible smartphone or tablet.
The mobile device you choose to run the app must have a data plan.
Once installed, log into the app with your username and password.
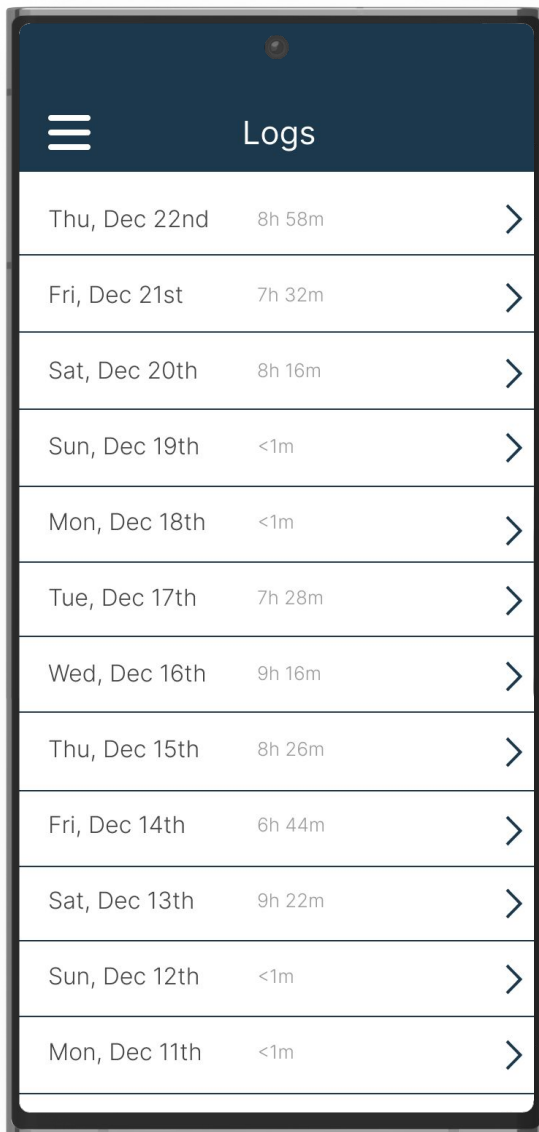

Automatic Driver Logs

ELD captures your driving time automatically every time the vehicle moves at a speed of 5 or more miles per hour, and the app will set your status to Driving. If the vehicle does not move for more than five minutes, you will be asked if you want to switch your status. Upon lack of response, your status will change to On Duty.

Go to Status from the main menu to change your status when appropriate-while driving, this and other features are blocked for your protection.
