# Installation & Connection

## Install the LORRY™ device in your vehicle

1. With the engine off, locate the diagnostic port inside the vehicle. It is located in one of the four places:

2. Attach the device to the diagnostic port of the vehicle.

3. Once the device is installed, ensure the device is working properly as evidenced by a green LED light blinking. The green light starts blinking after a GPS & Cellular connection is initiated.

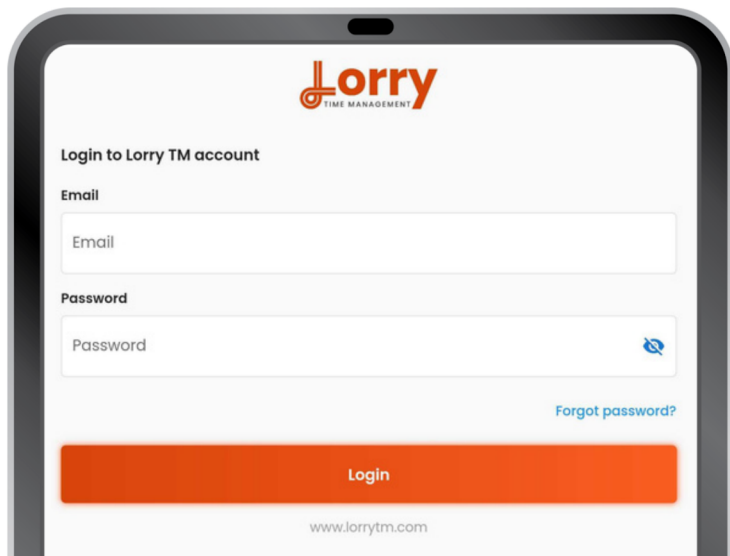

4. Mount your device away from electrical components (they may cause interference).

# Installation & Connection

## Install the LORRY TM App

You will get a link to lorrytm.com, where you will download the app. you will also receive your personal log in details with which you will connect to the application.

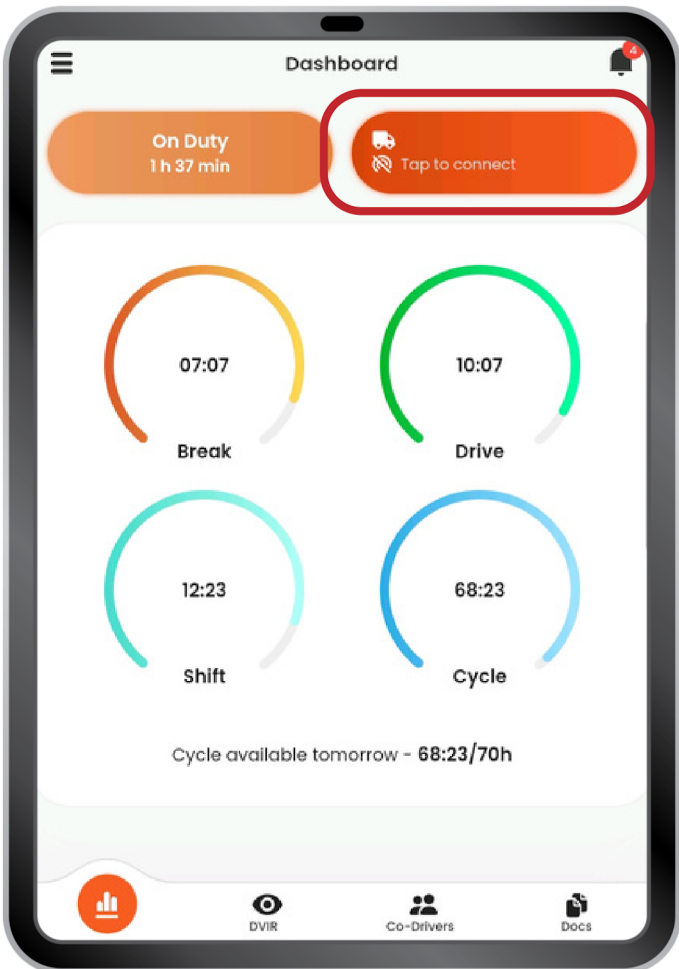

## Login to the LORRY App

When you enter your LOG IN information in the app, the app will connect automatically.

## ! Dashboard View

After successfully login & vehicle selection, the Dashboard page is open. Use **Tap to Connect** bar to connect to your vehicle.

Once you are **connected** to your device, you will be asked to add your co-driver,

You can do this step later, by clicking on the button **CO-DRIVERS**.

After finishing co-drivers step, you will be asked to fill **LOG FORM**.

The image shows a mobile application interface for a 'Log form'. The screen has a light green background and a dark grey border. At the top center, the title 'Log form' is displayed. Below the title, there are three sections:

- Vehicles**: A text input field containing the number '3071'.
- Trailers**: A text input field with the placeholder text 'Enter tag...'.
- Shipping Docs**: A text input field with the placeholder text 'Enter tag...'.

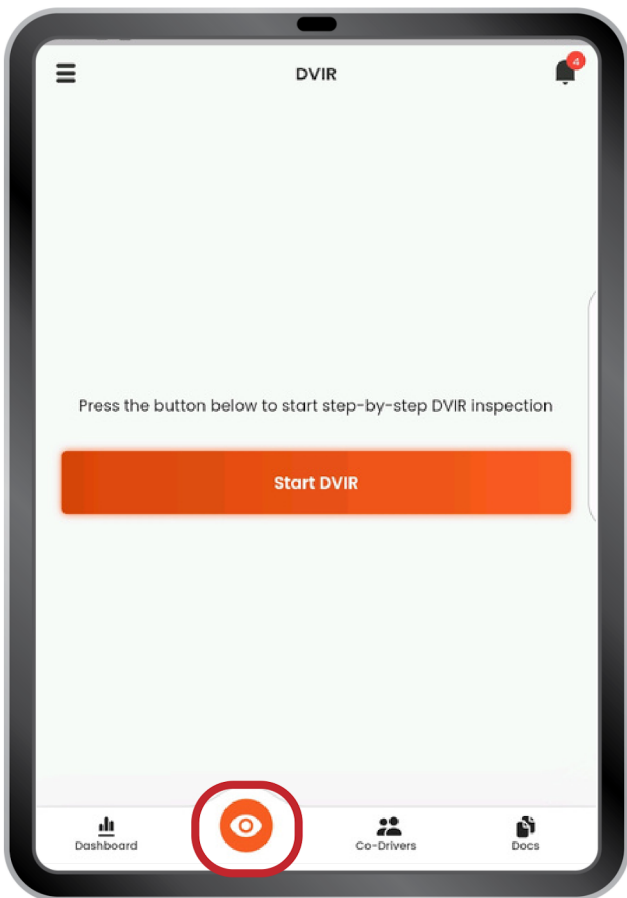

At the bottom of the screen, there is a blue button with the text 'Continue' in white.

You can finish this step later, by clicking on the button **DOCS**.

# Installation & Connection

## Complete adding **CO-DRIVER**

If you have a co-driver, you will add him by clicking on the button **CO-DRIVERS**.

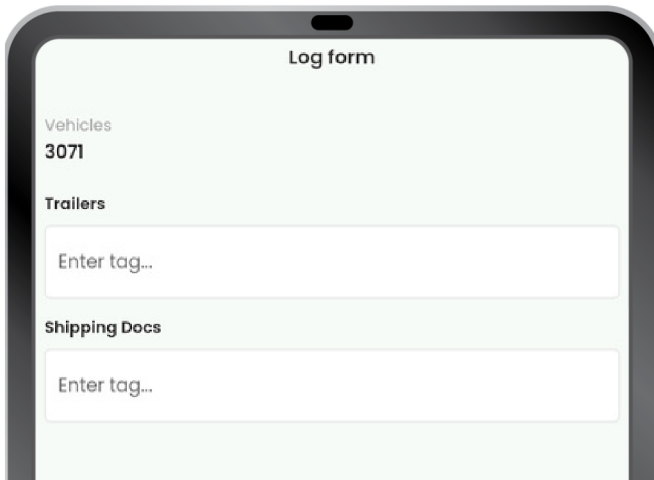

From the co-drivers list, choose your co-driver and connect with him/her.

# Installation & Connection

## Populate Log Form Data

Select the **Docs** button from your Dashboard to add the Trailer/Shipping Docs number.

A screenshot of the 'Log form' screen. The title 'Log form' is centered at the top. Below it, the 'Vehicles' section shows the number '3071'. The 'Trailers' section contains a text input field with the placeholder 'Enter tag...'. The 'Shipping Docs' section also contains a text input field with the placeholder 'Enter tag...'.

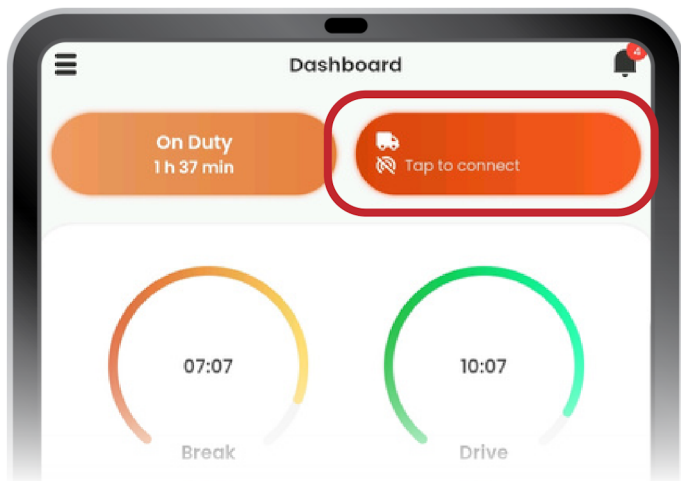

# Installation & Connection

## Connect your mobile device to the LORRY™ device

### ! Enable Bluetooth

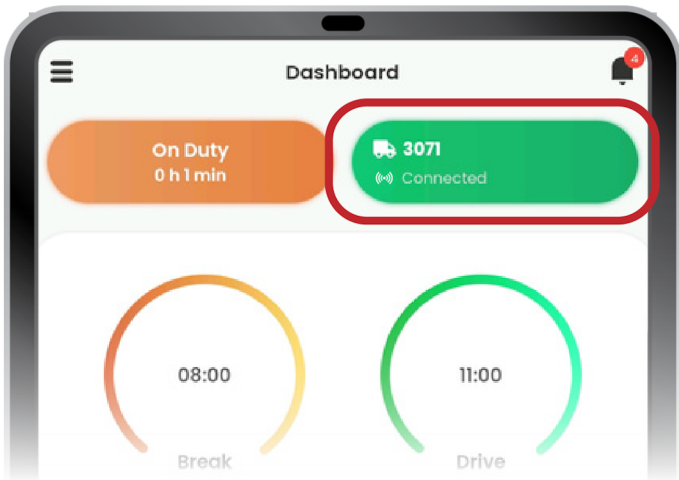

Please ensure that Bluetooth is enabled on your device before you connect to the LORRY™ device.

In the main Dashboard view, there is a **Tap to Connect** bar - just below the vehicle number.

Use the **Tap to Connect** bar to connect to your vehicle. The device will attempt to connect to the selected vehicle ELD via Bluetooth. ELD bar will change to **Pairing**.

An  icon will appear in connection bar upon successful connection

### **Ready to Drive**

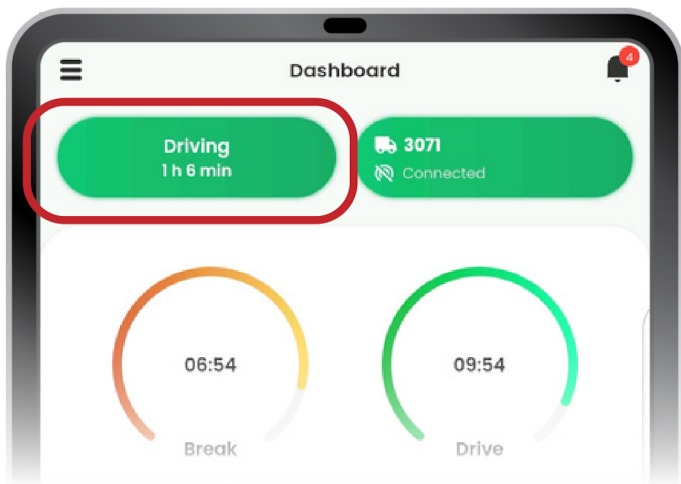

Once you've completed all of tasks in this section, you're ready to drive.

When your vehicle is moving at 5 MPH or greater, your duty status will automatically switch to **Driving** in accordance with the ELD mandate.

# Installation & Connection

## Record Hours of Service

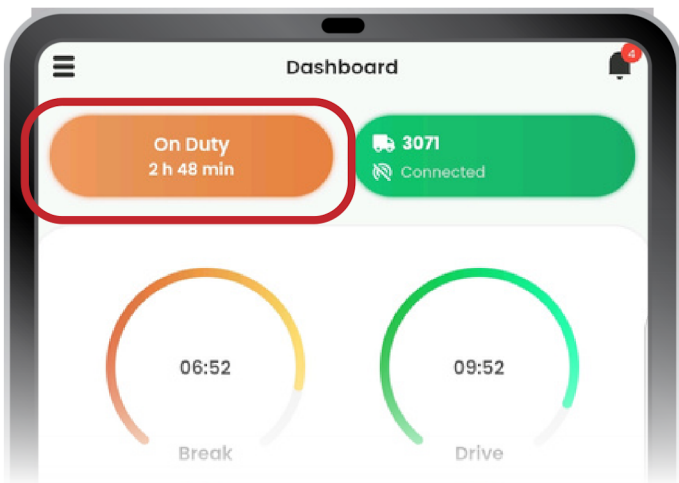

When your vehicle reaches 5 MPH or greater, LORRY™ is indicating that the vehicle is **In Motion**, and your duty status will automatically change to **Driving**.

When the vehicle stops (0 MPH), it's considered **Stationary**.

You can change your duty status by tapping **Driving** and selecting some other duty status.

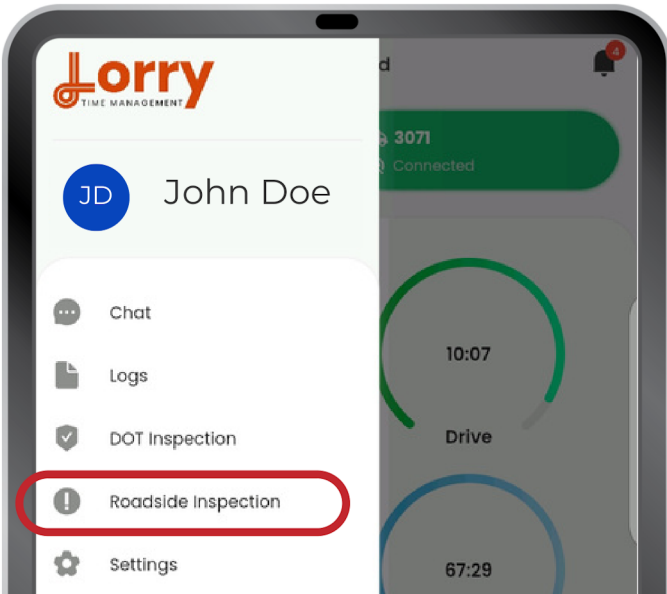

If your vehicle remains **Stationary** for five minutes, you will be prompted with a question if you would like to change your duty status. If you ignore this question, your duty status will be changed to **On Duty**.

# DOT Inspections

## Inspect Logs

To begin the DOT Roadside Inspection, tap the menu icon on the top left and select the **Roadside Inspection**.

If a police officer stops you, you must add the officer's comment here and send it to your superior via email or web service.

A screenshot of a form titled 'Output File Comment'. At the top, there are two orange rounded buttons labeled 'Web Service' and 'Email'. Below these buttons is a text input field with the placeholder text 'Type...'. The entire form has a light green background.

# Malfunction Responsibilities

## Carrier Responsibilities Regarding Malfunctions

The carrier must:

Provide drivers with an instruction sheet describing the various ELD malfunction events and record-keeping procedures (this document).

Provide drivers with a supply of 8 days' worth of blank paper driver records.

Repair, replace, or service

The motor carrier must correct the malfunction of the ELD within 8 days of discovery of the condition.

**OR**

driver's notification to the motor carrier, whichever occurs first.

# Malfunction Responsibilities

## Record Keeping Responsibilities by the driver

The driver must:

### Malfunction Events

Note the ELD malfunction and provide the carrier with written notice within 24 hours.

Reconstruct driving events for the current 24 hour period and previous 7 consecutive days using paper logs.

Continue to manually prepare driving logs until ELD is serviced and brought back into compliance.

During inspections which take place when a malfunction has occurred: provide safety official with manually kept driver logs.

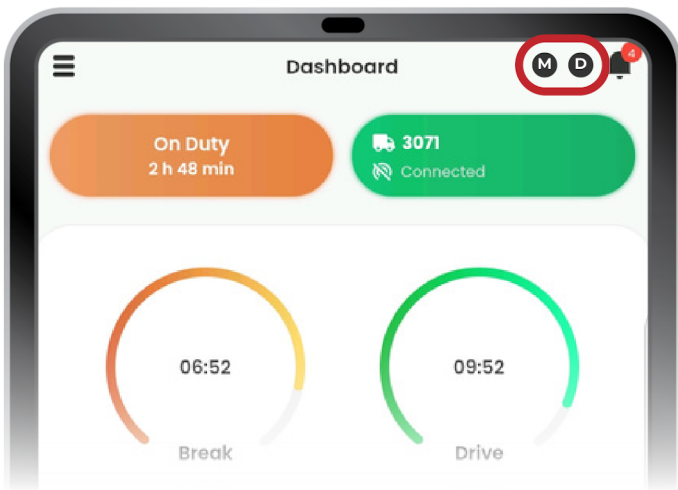

### Data Diagnostic Events

The driver must follow the motor carriers and ELD provider's recommendations in resolving the data inconsistency.

# ELD Malfunction

Diagnostic and Malfunction events show up in the application's header (top right) as a capital **D** and capital **M**. The **D** stands for diagnostic events, and the **M** for malfunction events.

Tap **D** (diagnostic data) or **M** (malfunction) to view error details.
