Attention

For legal and safety purposes, please refrain from calling your office, customer support line, or safety personnel while driving.

Installation ELD Device

Step 1.

Make sure that your vehicle's engine must be OFF. If the engine is ON, please turn it off and turn the key the "Off" position before connecting to the ELD device.

Step 2.

Locate the diagnostic port inside your vehicle's cabin. The diagnostic port is typically located in one of the following places: ① under the left side of the dashboard, ② under the steering wheel, ③ near the driver's seat, ④ under the driver's seat.

Installation ELD Device

Step 3.

To connect the ELD plug it into the diagnostic port of the vehicle. Unscrew the lock surface until it locks. Make sure the ELD is connected.

Step 5.

Then, get the tablet provided by fleet and turn it on. Tablet should automatically start application.

Step 4.

Once plugged in the device will start syncing with the engine control module (ECM) and New ELD World application on the tablet.

Downloading Application

For Android Devices

Type “**InTime Eld**” into the search bar of Google Play Store. Tap on “Install” button to download the app into your device.

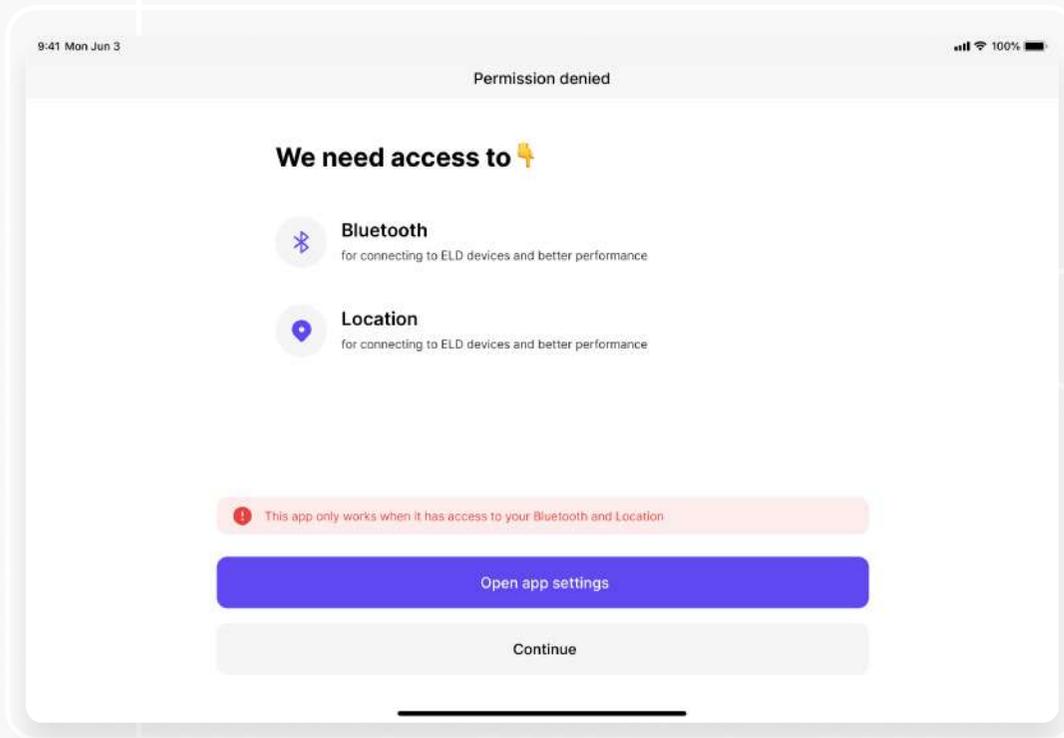

For IOS Devices

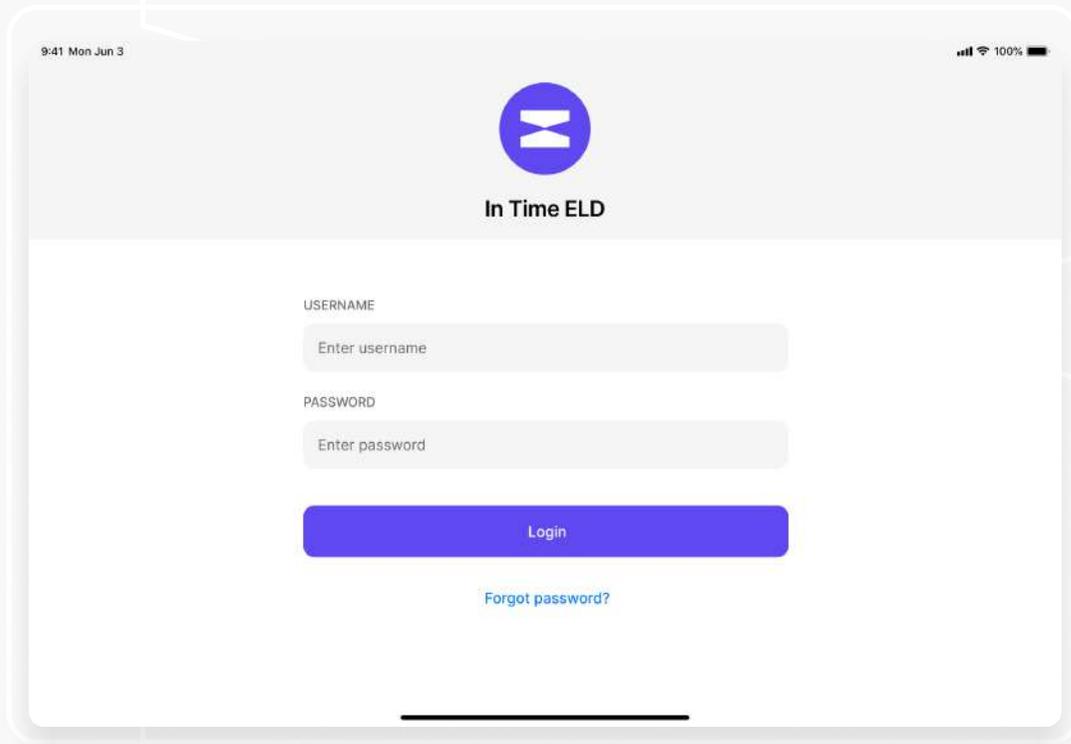

Type “**InTime Eld**” into the search bar of App Store. Tap on “Get” button. Tap on “Install” button to download the app into your device.

Permission for resources

First of all app need to get access to bluetooth and location for exchanging data between driver's mobile device and **ELD device.**

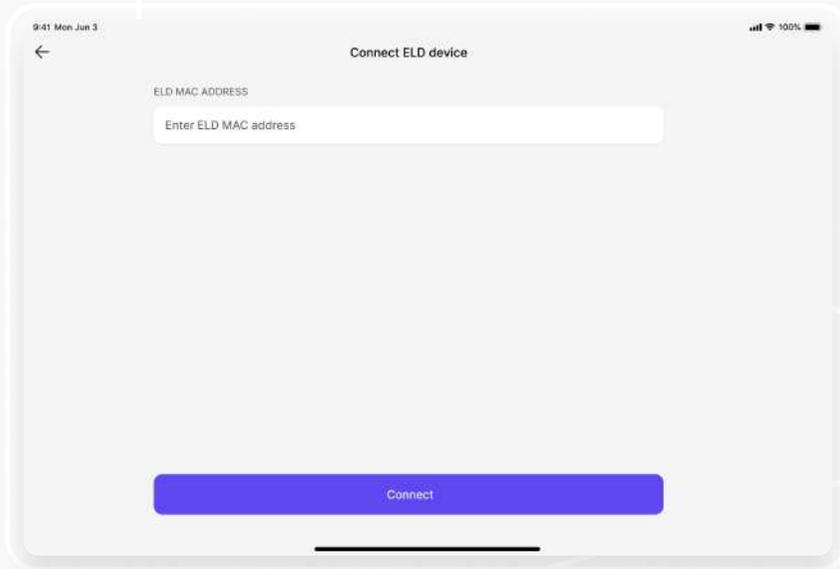

Signing In

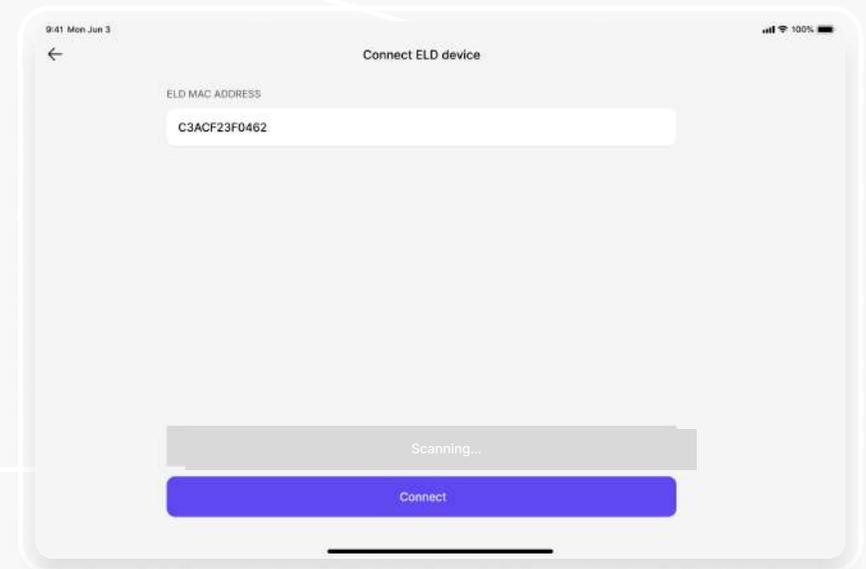

Driver can enter the app by using **username** and **password** which created for exactly for this driver.

Connect ELD

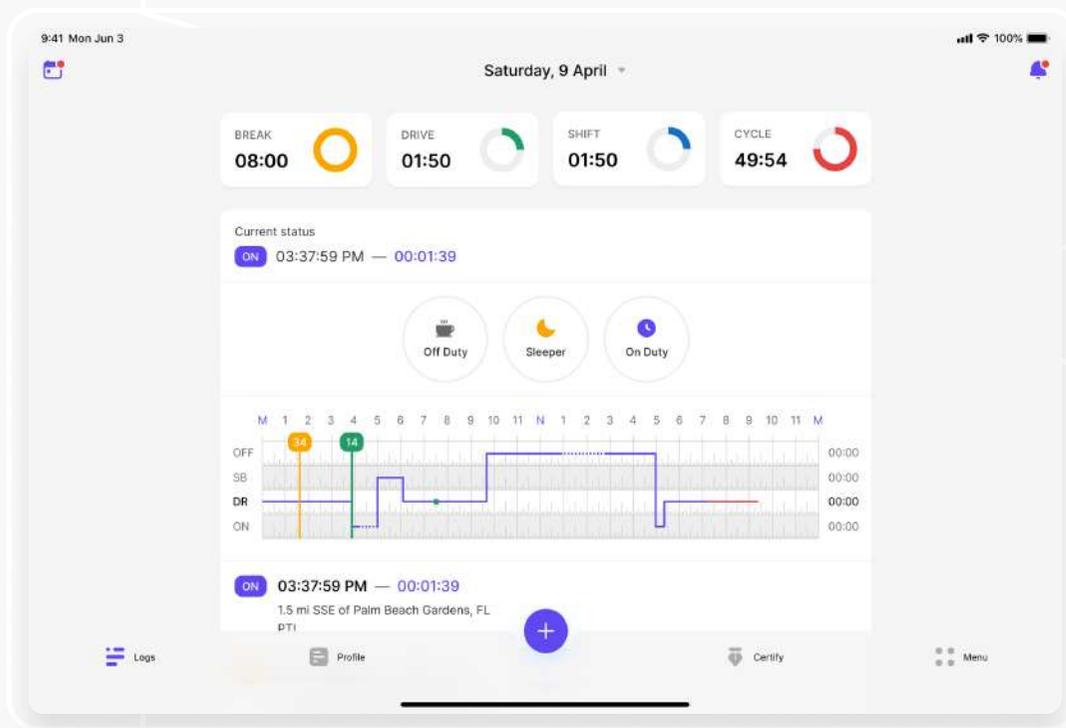

By touching on the screen of mobile device application can get IP Adress of the ELD. By pressing '**Connect**' button ELD device starts working with our application.

Your cellular device will automotically scan ELD.

The view of home screen of the application.

Driver must swap screen by time to reload new data and refreshing the screen.

Duty statuses

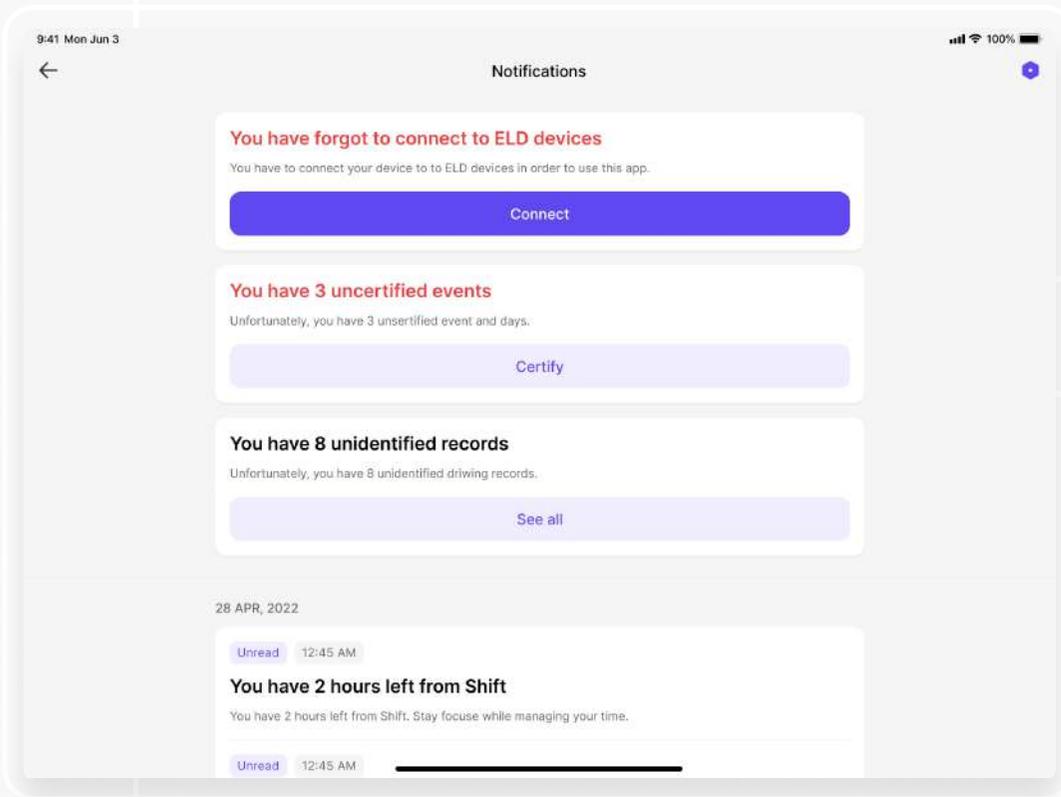

In this section driver can see time indicators value which belongs to his/her duty status.

From the statuses in the main window, driver can select a status depending on your situation

Driver's graph will be shown here.

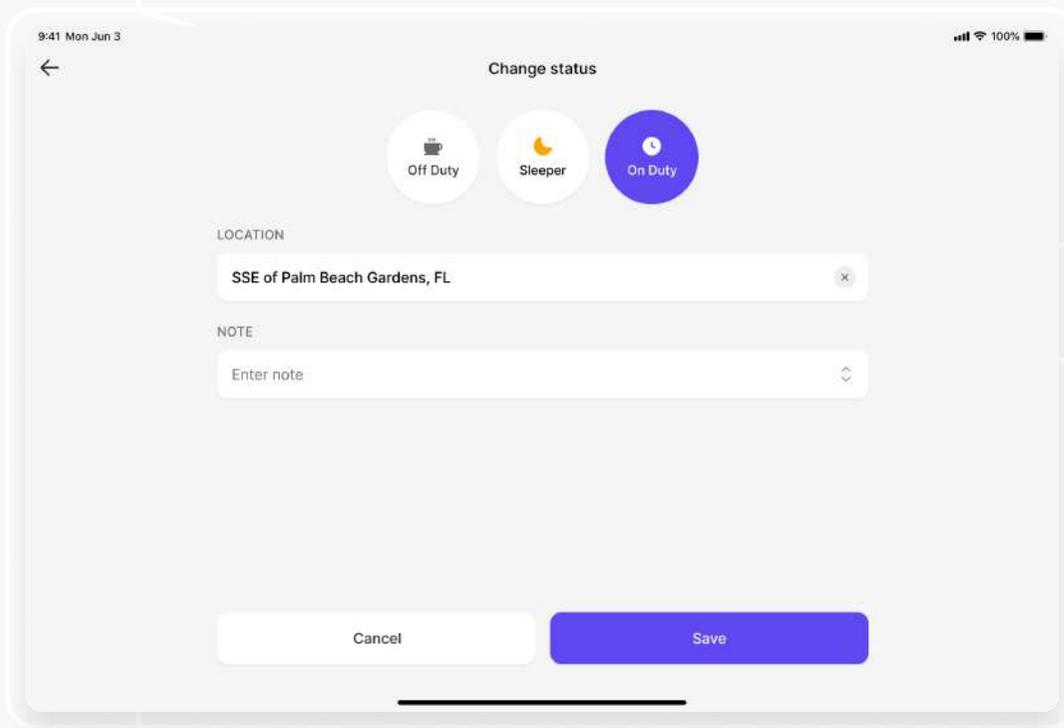

To change duty status driver have to click this + icon button.

Notification

Driver's **errors, violations** and messages related to him/her work statuses can be seen in the notifications section.

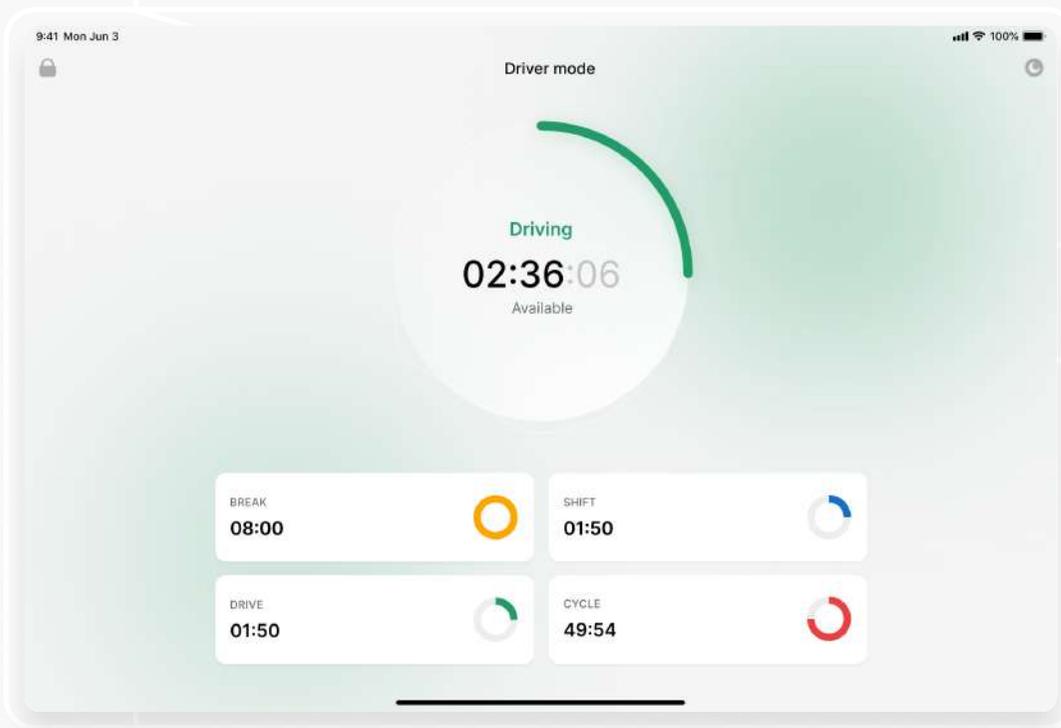

Changing status

The screenshot shows a mobile application interface for changing status. At the top, the status is set to 'On Duty', indicated by a blue circle with a clock icon. Below this, there are three status options: 'Off Duty' (with a coffee cup icon), 'Sleeper' (with a moon icon), and 'On Duty' (with a clock icon). The 'On Duty' option is currently selected. Below the status options, there are two input fields: 'LOCATION' with the text 'SSE of Palm Beach Gardens, FL' and 'NOTE' with the placeholder text 'Enter note'. At the bottom, there are two buttons: 'Cancel' and 'Save'.

To change current status to another one driver must pick one status and fill information fields(location,note) then save.

Driver on the road

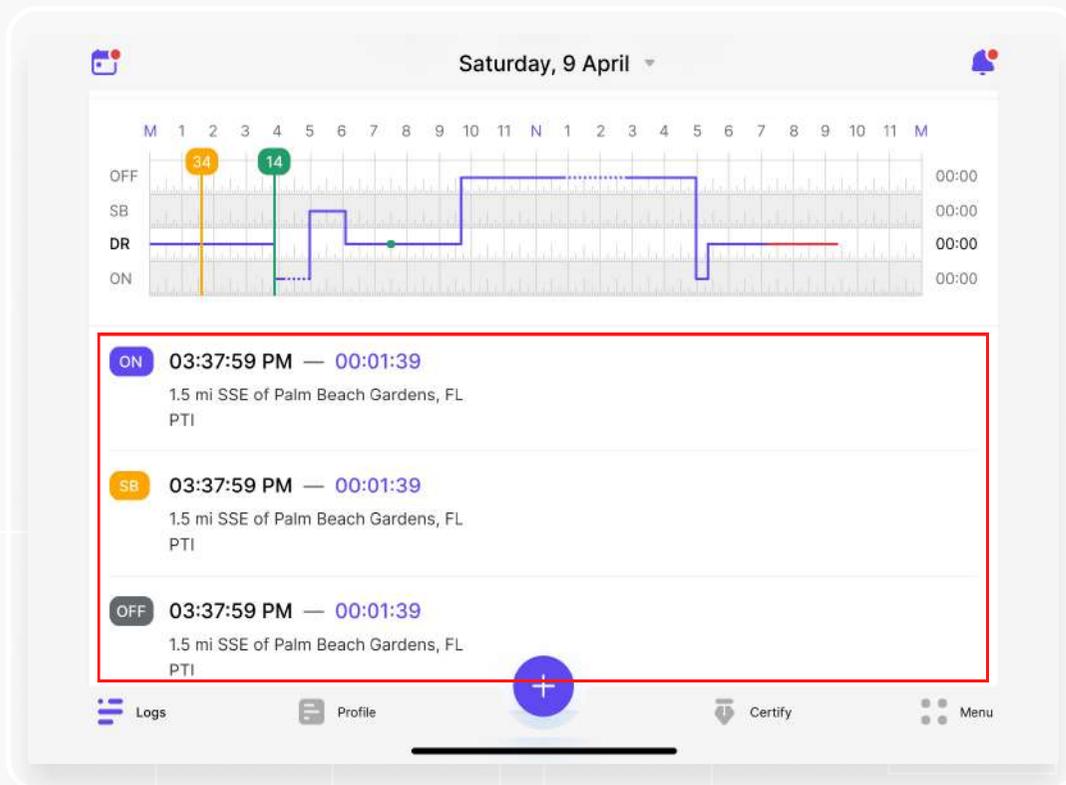

Once you have connected your mobile device to InTimeELD, your driving time automatically recorded. When your vehicle begins moving, your duty status will automatically be set to **Driving**. At 5 mph (or more) the vehicle is considered **Drive**.

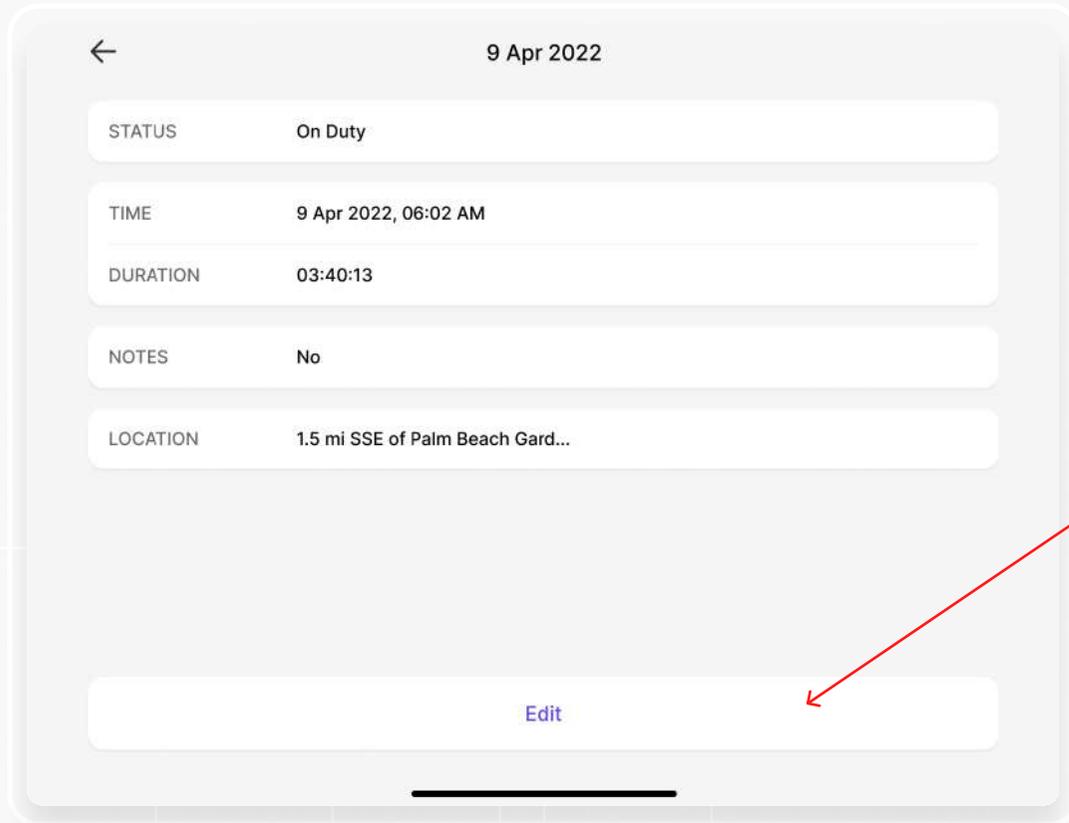

When driver stops moving, Drive screen waits for 3 minutes, if the speed does not exceed at 5mph (or more) the Drive status will be exited.

Editing status

Go to the main «Logs» screen. Click on any log from the logs table.

Editing status

The page which this log's info placed will be opened.
Then click “**Edit**” button.

Editing status

You will be able to change the **timeline** of the chosen status: tap on the timeline and move it right to prolong, or left to shorten it.

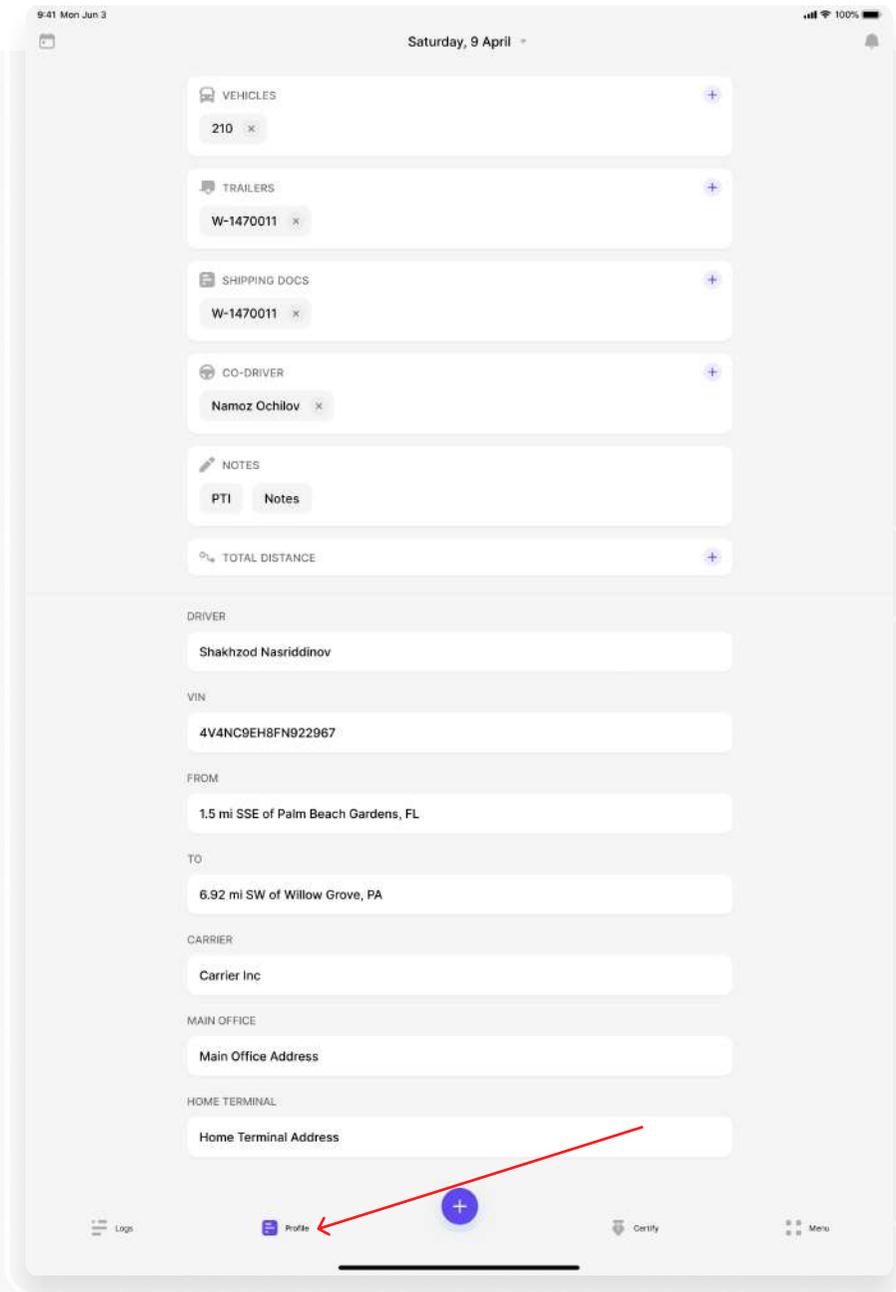

Also, you can edit the status timeline by using the fields “**From**” and “**To**”

To edit the type of the **status**, tap on the needed status from the list of the offered statuses.

Press “**Save**” to save changes.

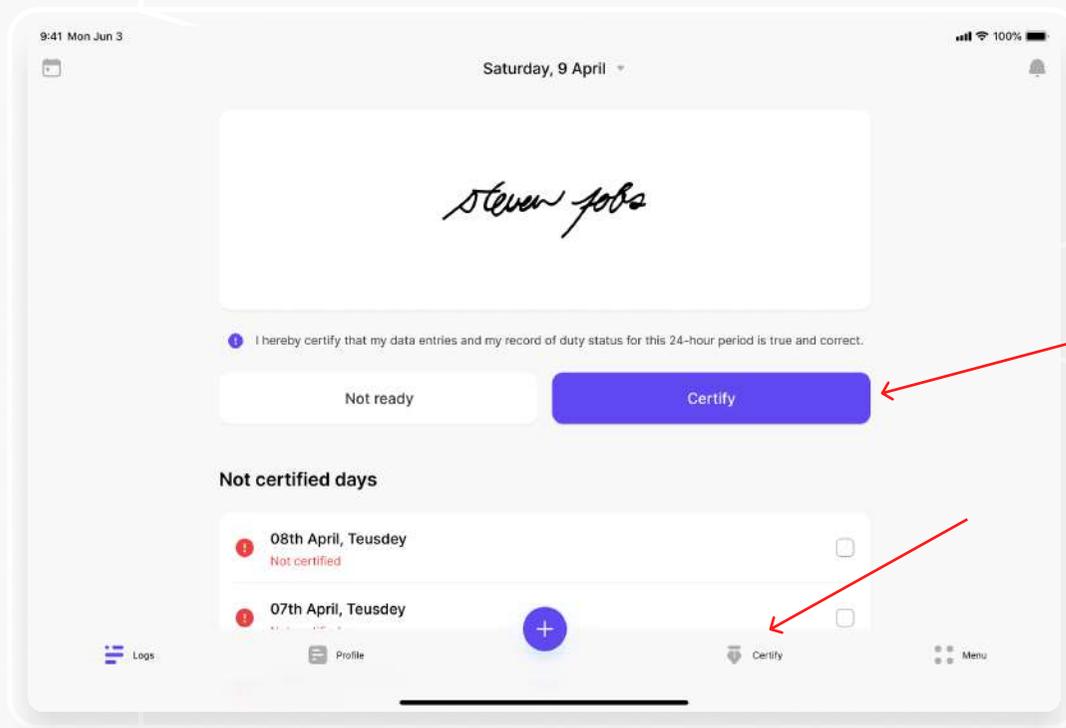

The screenshot displays the 'Edit' interface for a status on Saturday, 9 April. At the top, there is a back arrow and the title 'Edit'. Below this is a calendar icon and the date 'Saturday, 9 April'. The main area features a timeline with four tracks: OFF, SB, DR, and ON. The 'On Duty' track is currently active, indicated by a blue bar and a blue button. Below the timeline, there are three buttons: 'Off Duty', 'Sleeper', and 'On Duty'. Further down, there are input fields for 'FROM' (06:02:59), 'TO' (09:43:12), 'NOTE' (Fuel), and 'LOCATION' (1.5 mi SSE of Palm Beach Gard...). At the bottom, there are 'Cancel' and 'Save' buttons.
