Installation of IOSiX Device for use with InTouch ELD

○ Open InTouch ELD
○ Login to the app using a driver user account
○ On the main dashboard, tap the ‘Connect’ button which is located below the app header to display the ‘Connect to Vehicle’ dialog.
○ At this point, 2 options were present in order to establish a connection to the VBUS device: Manual Connection and Auto Connection.

A. Manual Connection
- Tap on the ‘Manual Connection’ button

- Select VBUS Device - IOSix

- Tap on the Next button
➢ If the Bluetooth of the device is disabled, the ‘Bluetooth Permission Request’ dialog will be displayed.
➢ Tap on the Yes button to enable the Bluetooth of the device

○ Choose the correct Bluetooth device from the list
○ It will then display the VBUS Progress dialog upon establishing a connection to the selected VBUS device along with a ‘Stop Connection’ and ‘Ok’ buttons:
  A. Tap ‘Stop Connection’ button to stop establishing VBUS connection.
  B. Tap OK button to hide the VBUS Progress dialog while establishing VBUS connection.

○ If the VBUS connection results to an error (given the following situations below), an error dialog will display.
  ■ VBUS Data Error
    i. Interrupted Internet Connection
ii. VBUS Power Failure

**Note:** The app will automatically disconnect from the device after attempting to connect for 1 minute and 30 seconds without receiving any data from the VBUS device.

- Upon establishing a connection to the VBUS device you should hear a tone letting you know that device is now connected.
- To check if you are connected, navigate to the Main Dashboard and the VBUS status indicator should be displayed as “Connected” which is located on
the app header.

○ You can also check on the Android Notification Bar and you should see the VBUS Service status as “Connected”.
The device and the application are now connected.

B. Auto Connection

- Tap on the Connect button
- The VBUS Progress dialog will then display
- Upon establishing a connection to the VBUS device, you should hear a tone letting you know that device is now connected.

Prerequisites to successfully perform Auto Connection

- Create a Pre-configured device in the Portal’s Equipment Management Page or in the App’s Manage Vehicles/Trailers screen
- Set the ELD Configurations

Note: Only users allowed to Manage Equipment can create equipment in the app.
