How to install **ELD device**

Make sure your vehicle engine is turned off. If the engine is "ON", please turn it off and turn the key to the "OFF" position before connecting ELD device.

Locate the diagnostic part inside your vehicle's cabin. The diagnostic part is typically located in one of the following places.

- under the left side of the dashboard;
- under the steering wheel;
- near the driver's seat;
- under the driver's seat;

Connect the ELD plug to the diagnostic part of the vehicle. **Unscrew** the lock surface until it locks. Make sure the ELD is connected.

Once plugged in, the device will start syncing with the engine control module **[ECM]** and **STLELD** application on the tablet.

Then get the tablet provided by fleet and turn it on. Tablet should automatically start application.

Your tablet with STL ELD application will automatically scan for ELD.

When you log in to your **STL ELD** account, the app starts scanning for available ELD devices automatically. And the ELD device lights green, when it is ready to use.

Application guide

04

Application guide

You should choose shown ELD

Once the scanning is complete, select your ELD device from the displayed list of results.

If the ELD is connected to vehicle, you can see green icon on the top left corner of the dashboard.

If it is not connected, the Bluetooth icon will be grey out which indicates ELD is disconnected

Using STL ELD on the road

When your vehicle starts moving, your duty status will be automatically set as "Driving". Vehicle will be on "Driving" and "On duty" statuses when it reaches the speed of at least **5** mph.

06

Once you have connected your mobile device to ELD, your driving time is automatically recorded.

Using STL ELD on the road

Choose a status in the main window based on your current situation.

From the statuses in the main window, select "Off Duty", "Sleep", "On Duty" depending on your situation

07

Fill out location field and input remarks, such as "Pre-trip inspection" or "Coffee break" (if the location field is left empty, it will be automatically

ELD Malfunctions

395.22 Motor carrier Responsibilities

A motor carrier must ensure that its drivers possess onboard a commercial motor vehicle and ELD information packet containing the following items: An instruction sheet for the driver describing ELD malfunction reporting requirements and record-keeping procedures during ELD malfunctions.

The following instructions are in accordance with the guidelines set forth in 395-34

STL ELD will monitor and report malfunction data based on section "4.6 ELD's Self-Monitoring of Required Functions":

- **P** Power compliance" malfunction,
- T Timing compliance" malfunction,
- L Positioning compliance" malfunction,
- **R** Data recording compliance" malfunction,
- S Data transfer compliance" malfunction,
- O Other" ELD detected malfunction.

E – Engine synchronization compliance" malfunction,
