Recording drive time

The ELD considers a vehicle in motion when it exceeds 5 mph. When your vehicle is moving, your duty status automatically updates to DRIVING.

When your vehicle stops, after 15 seconds button "Change status" will become active, allowing you to manually change your duty status.

If the vehicle remains stationary for 1 minute, a message will appear with a 60-second timer, prompting you to choose whether to stay in DRIVING or switch to ON DUTY. If no action is taken by the end of the timer, the app will automatically switch your status to ON DUTY. If the vehicle starts moving again after this change, a new DRIVING status will be initiated.

USER MANUAL

Changing status

You can change your duty status on homepage. Select a status from the four main statuses and it will become active. Active status will be on top of the others. When you choose tag YM or PC a message will appear with confirming changing the status.

Yard Moves

Press the tag YM to change On Duty status to Yard Moves.

Personal Conveyance

Press the tag **PC**

to change Off Duty status to Personal Conveyance.

DOT Inspection

Open Inspection Page

Tap the Inspection menu item on the navigation at the bottom of the screen
