Extension for the Use of Paper Records of Duty Status for Users of Electronic Logging Devices Registered by Omnitrac, LLC

The Federal Motor Carrier Safety Administration (FMCSA) grants an extension of time as authorized under 49 CFR 395.34 for any carrier using the Electronic Logging Devices (ELD) model below registered by Omnitrac, LLC, allowing the carrier's drivers to continue to use paper records of duty status in lieu of the ELD device until the 3G dependent devices are replaced with a compliant 4G or 5G device, per Omnitrac, LLC's replacement plan. The device covered under this extension is as follows:

- 1.) Omnitrac Intelligent Vehicle Gateway, ELD Identifier: IVG001, Serial Numbers (SN) 108000000-108499999

Drivers using the identified ELDs may continue to record their hours of service on a paper graph grid, in accordance with § 395.8, until Omnitrac, LLC notifies FMCSA that the IVG001 ELDs have been upgraded or by March 31, 2022, whichever occurs first. As a condition of this extension, a carrier must maintain this letter at the carrier's principle place of business and keep a copy in each vehicle with a malfunctioning ELD. A driver must make the copy of this document available to a safety enforcement official upon request.
